

FLOOR STANDING CABINETS

NETSERVER

Universally compatible with a wide range of active equipment and heavy-duty servers the MR Netserver from M Ruddy & Co is suitable for combining various brands and sizes of equipment into one system.

The cabinet includes the Uni-Link mounting kit that enables easy installation of servers with vastly different depths into the one cabinet. The MR buying kit allows multiple cabinets to be connected together to form a suite of integrated racking enclosures, complete with cable management zones

The cabinet is built around a reinforced frame of CRCA steel and the system meets the industry standards of DIN 41494pt7, DIN 41491pt1, EN 60950, VDE 0100, IEC 297-2.

The Netserver is attractively styled to blend in with office environments; it comes powder coated in anthracite grey. It is available in heights 27U, 37U, and 42U. Shelves are available in a variety of configurations including sliding, vented chassis trays, cantilever and rotating keyboard

The front and rear 19" equipment mounting posts are fully adjustable to allow the installation of a wide range of products and the mounting posts also double as cable management channels.
